Project Leadership

The complete experience of running a challenging large scale project – in an AI Simulation workshop

In a rapidly changing world, organisations need people who can lead projects with confidence and skill. The simulated environment develops and hones the ability to lead and build consensus in change projects, for the organisation to move at pace and remain resilient.

Many project teams and Sponsors learn these valuable skills through bitter experience. This simulation workshop is a safe and effective way of building the skills without risk to your career, or the organisation.

Beneficial for those who are charged with delivering large complex projects:

- Project and Programme Managers.

- Project Team Leaders and Team members

- Project Sponsors and Steering Committee members
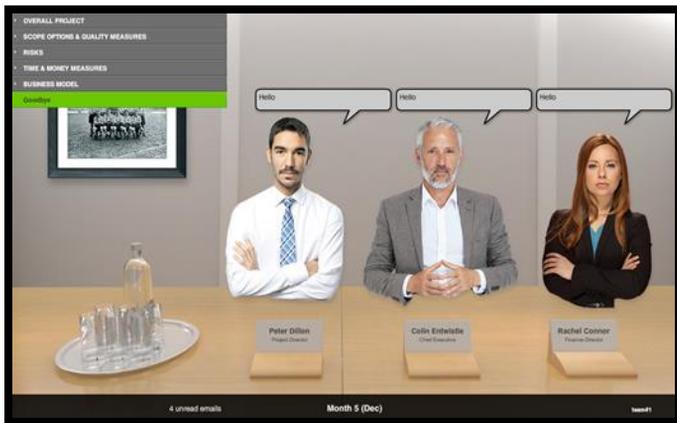

Live Facilitator guides teams of 3 people in virtual, or classroom setting

- Develop skills for managing risks, timelines, budgets, resources and key stakeholders through a complex and challenging major project.

- Learn to lead and build consensus around achieving the right business outcomes whilst juggling the constraints of time and resources.

- Hone your skills in making good decisions fast, with incomplete or ambiguous information.
